

INTRODUCING REVOLUTION™

INNOVATIVE FEATURES

- **UPGRADES** including SCENT-LOK®, Thor Shield™, and the new Tactical Upgrade package
- Breath-O-Prene® shoulder padding for added comfort
- High denier microfiber twill fabric construction - adding durability and longevity to the carrier
- Microfiber wear-strip along duty belt minimizes effects of abrasion
- Internal soft armor suspension system holds armor in place to prevent sagging and curling
- Fully adjustable shoulders and waist

UPGRADES

Customize your Revolution™ with these three different upgrades.

These upgrades can increase your safety on the job and give you the confidence to perform your duties without a second thought.

Add a Scent-Lok® inner lining for superior odor control.

Thor Shield™ inner liner for protection against TASER® brand devices and stun gun threats.

TACUPGRADE

The Tactical Upgrade has a hidden medical information strip, a hidden knife pocket, and an attachment point for ID badges.

Long-wear scenarios - Added comfort is found in the addition of both the **SCENT-LOK®** inner lining, and the Breathe-O-Prene® shoulder padding. These two features make the Revolution™ a desirable choice for officers with extended hours of operation.

Superior design - The Revolution™ carrier is made from a high denier, anti-static, water repellent treated microfiber nylon. The carrier features Easy Grip Side Straps™ for ease of adjustment and removal of the vest.

The Revolution™ is AE's top of the line concealable carrier system. Loaded with features, the Revolution™ sets the mark for superior design with attention to detail, while offering maximum comfort, breathe-ability and durability.

The shoulder area offers 3mm thick Breathe-O-Prene® padding. The low profile padding is porous in nature allowing warm moisture laden air to pass through as it cushions the area thus helping to relieve any potential discomfort.

The Revolution™ utilizes a superior Microfiber Nylon for its exterior shell material. The slightly denser material results in greater durability and longevity. It is also water repellent and anti-static treated. The standard Revolution™ carrier inner lining consists of Breeze Knit™, a moisture wicking, antimicrobial material that provides evaporative cooling. Upgrades are available for the Revolution™ carrier: (1) add a Scent-Lok® inner lining for even more odor control, (2) add the Thor Shield™ to your liner for protection from stun devices such as Taser™, (3) add the Tactical Upgrade to your Revolution™ offering: a hide-a-way medical information strip, a hidden knife pocket, and ID Badge Hook and Loop. Also available - an IFAK pouch to add to your side strap.
